YOUR INSTAGRAM AUDIT

A ready-to-paste prompt that turns Claude into a no-mercy growth strategist: it opens your live profile, judges it like a cold first-time visitor, and delivers a full audit with scores, a rewritten bio, hook rewrites, and a 7-day action plan.

2 WAYS: BASIC (CHROME) & PRECISE (CHATPLACE)

WHAT THIS IS

This is not "another checklist". It is a **ready-made command for AI** that opens your Instagram and takes it apart the way a paid strategist would. It scores every element out of 10, rewrites your bio and hooks with exact words, and gives you a day-by-day plan for the week.

The audit is harsh on purpose: **better embarrassed now than broke later**.

HOW IT WORKS — 2 WAYS

OPTION 1 — BASIC (CLAUDE + CHROME)

1. Open Claude and connect the browser: the **Claude for Chrome** extension (or use a Claude that can open websites).
2. Log into your Instagram in that same Chrome.
3. Copy the prompt on page 3, paste it into Claude, and fill in the CONTEXT block with your details.
4. Claude opens your profile, studies it, and delivers the audit.

This way the AI sees exactly what a human sees — enough for an honest first-impression audit.

OPTION 2 — MORE PRECISE (VIA CHATPLACE MCP) 🔥

Want an audit based on numbers, not just "by eye"? Connect **Chatplace MCP** and Claude will pull real analytics: reach, engagement, post and Reels stats, follower dynamics. The audit becomes precise — on data, not guesses.

With Chatplace the AI sees what a random visitor can't: which formats actually take off, where watch-time drops, which posts drive follows and saves. That raises the accuracy of the recommendations to a different level.

HOW TO CONNECT CHATPLACE MCP IN CLAUDE

1. In Chatplace, get the MCP connection details (connector URL and, if required, an access key/token) — in the integrations / API section.
2. Open Claude → **Settings** → **Connectors**.
3. Click "**Add custom connector**" and paste the Chatplace MCP URL. When prompted, authorize (paste the key / sign in).
4. Make sure the connector shows as "connected" and its tools are available to Claude.

If you don't see "Connectors" — update Claude to the latest version; MCP connectors are available in current app versions.

WHERE TO ENABLE BYPASS PERMISSIONS

So Claude doesn't ask for approval on every step (open a page, pull data from Chatplace) and runs the whole audit without stopping:

Option A — on first request. When Claude first asks to use a tool (Chrome or Chatplace), choose "**Always allow**" — the following steps will then run without re-asking.

Option B — in connector settings. In **Settings** → **Connectors**, open the connector and allow its tools (permission toggles).

For Claude Code (advanced). Cycle the permission mode with **Shift+Tab** to **bypass permissions**, or launch with the auto-approve flag. Enable it deliberately — in this mode Claude acts without re-asking.

Safety: bypass mode is convenient for auditing your own account. Don't leave it on for untrusted sites or links from others.

THE PROMPT — COPY IT ALL

Paste into Claude, replace everything in square brackets with your details.

ROLE

Act as a senior Instagram growth strategist who has scaled multiple course-creator and personal-brand accounts past 100k and into consistent sales. You are brutally honest, specific, and allergic to vague advice. Every critique must be actionable.

TASK

Use the Chrome connection to open and study my LIVE Instagram profile, then deliver a detailed, no-mercy audit. Judge everything the way a cold first-time visitor decides in 3 seconds whether to follow — and whether to ever buy.

CONTEXT (fill in so the audit is precise)

- Profile URL: [link]
- Who I help (ideal follower): [e.g. busy women who want a better Instagram without spending all day on it]
- What I sell and price: [e.g. a 499 RUB PDF guide + a subscription]
- My main goal right now: [grow / convert followers to buyers / both]

WHAT TO INSPECT (do all of this before writing)

1. Name field, @handle, bio, profile photo, link-in-bio (open it and judge the destination).
2. Highlights: covers, titles, and the first 2-3 frames of each.
3. The grid as a first-time visitor: scroll and read the last 12 posts as a whole.
4. Open my 3 most recent posts fully — read hooks (first 1-2 lines), full captions, and CTAs.
5. If Reels exist, open 2-3 and judge the first 3 seconds + on-screen hook text.
6. Note any visible signals: pinned posts, view/like ratios, comments, what people actually respond to.

SCORING

Score each section 0-10 with one-line justification. Then give two headline scores:

- FOLLOW-WORTHINESS (would a stranger tap Follow?) /10
- BUYER-CONVERSION (does the profile turn a follower into a buyer?) /10

No participation trophies — a 5 is average, most accounts are 3-4.

WRITE THE AUDIT IN THESE EXACT SECTIONS

1. FIRST 3 SECONDS — What does a cold visitor understand and feel in the first 3 seconds (photo + name + first bio line)? Is it instantly clear who this is for? If not, say exactly what's confusing.
2. POSITIONING & NICHE — In one sentence, who do I help and what do I sell? If you can't say it clearly from my profile, that's the core problem — name it.
3. BIO AUDIT — Is it clear who I help, what I sell, why to follow? Rewrite my name field and bio. Give me 2 full before→after versions I can paste in right now.
4. PROFILE FUNNEL — Do name → bio → link → highlights → content work as one funnel toward a purchase, or do they leak? Where exactly does a potential buyer fall out?
5. GRID AUDIT — As 12 posts together: what's the overall message and vibe? Is it cohesive? Is it the RIGHT vibe for my offer? What breaks the pattern?
6. HOOK AUDIT — Quote my first 1-2 lines back to me verbatim for each recent post. Rate each hook, say exactly what's weak, and rewrite my 3 weakest hooks into scroll-stoppers.
7. CONTENT MIX — Estimate the % split: lifestyle vs education vs personal vs selling. Compare to what my goal needs. Give me a target % and what to post more/less of.
8. HIGHLIGHTS & CTAs — Are highlights doing sales work (proof, offer, FAQ, start-here)? Are my CTAs actually asking for a next step? Fix the weak ones.
9. THE ROAST — The top 5 things to fix THIS WEEK, ranked by impact × ease. For each: the problem, why it costs me growth or money, and the exact fix (words, not vibes).
10. 7-DAY ACTION PLAN — A day-by-day list of what to change and post this week to start growing and converting immediately.

RULES

- Be blunt. Don't be nice. Quote my real words back to me.
- Never say "make it more engaging" without showing the exact rewrite.
- Prefer specific words, numbers, and examples over adjectives.
- End with the single highest-leverage change I should make today.

I'd rather be embarrassed now than broke later.
